Diversity: The School of Information Science defines diversity as "embracing differences between people and promoting increased understanding regarding age, ethnicity, gender, marital status, military service, physical disabilities, race, religion, sexual orientation, socioeconomic condition, and thought with the purpose of creating an inclusive community." In this course, we address diversity in several ways. Part of the semester-long project incorporates a diversity-related goal. Readings which are especially relevant to the theme of diversity are marked with a 📌 symbol.

Technology: The School of Information Science emphasizes the importance and centrality of technology in today's society. We must develop familiarity and comfort with an array of technology. In this course, we incorporate technology across multiple readings. Readings that are particularly relevant to the theme of technology are marked with a 📖 symbol.
