University of Kentucky  
School of Library & Information Science (SLIS)

IS 402 Competitive Intelligence  
Section 201, Fall 2018  
August 22 – December 14

Instructor  
Barbie E. Keiser, Adjunct Instructor  
6101 Edsall Road #1502  
Alexandria, VA 22304  
Barbie.Keiser@uky.edu  
Tel 703-823-4085  
Preferred method of contact: email  
Alternate email addresses:  
bkeiser1@jhu.edu  
Barbie.Keiser@gmail.com

Office Hours  
• Email instructor to schedule a voice (phone) or text chat  
• Expect a response within 24 hours

Class Information  
• While this course is being taught ONLINE, efforts will be made to schedule synchronous sessions throughout the semester, based on availability of students. All sessions will be recorded for the convenience of others (to access later in the week).

Course Information

Course Description  
This course examines competitive intelligence models, functions, and practices; the roles of information professionals in CI, and the management of CI. Discussion and practice topics include: intelligence ethical and legal considerations; identifying intelligence needs; intelligence project management, research methods, analysis, production, and dissemination; the uses of intelligence; intelligence sources and tools; managing the intelligence function; and the evolution of CI.

Course Objectives  
This course introduces students to the study and application of basic Competitive Intelligence (CI) theories, concepts, processes and practices, and techniques and tools, set within the context of ethical business practice. At the conclusion of this course, students will be able to:

• Articulate the role of Competitive Intelligence (CI) and Competitive Analysis (CA) within for-profit and not-for-profit organizations
• Evaluate the quality of sources in a business intelligence context
• Build a comprehensive and cost-effective information strategy, independent of media and format, that is appropriate to your organization’s culture
• Demonstrate an understanding of the use and value of different information sources available for competitive intelligence analysis
• Analyze and integrate information from a range of business information sources
• Organize CI in a logical fashion and make it accessible to those who need to/should use it, applying appropriate measures of security, so as to point toward a solution
• Appreciate effective, ethical techniques for conducting primary and secondary research, as well as the importance of ethics when presenting CA results and recommendations
• Develop actionable CI products to meet the needs of your organization/client.

Course Overview
During this semester, students will learn the fundamental principles and practices of competitive intelligence (CI). This course will have you exploring all facets of CI from organizational issues, such as how successful CI functions are managed, to practical individual skills building.

The course begins with a theoretical framework for competitive intelligence, and then extends this structure, focusing on how data and information collection and analysis is accomplished by competitive intelligence practitioners. Students will learn to apply the CI process and CI-related methodologies, techniques, and tools to better analyze an organization’s current and future competitive position.

Course Outline
The course will enhance basic research fundamentals as well as introduce you to alternative means of obtaining and developing market, industry, and company insights. Topics include:

• Establishing an effective CI team and process
• Properly framing decision-support assignments (purpose and scope issues)
• Creating a source map and designing a collection plan
• Performing online (secondary) research
• Conducting primary (subject matter expert) interviews
• Applying analytic frameworks for competitive advantage (CA)
• Leveraging software tools
• Organizing and maintaining competitive data and information
• Effectively communicating competitive intelligence.

Required Reading
Readings required to master the topics for each week are included in the course calendar (below). Weekly lecture notes can be found in Canvas. These are designed to remind you of points made in the readings and during the live or recorded discussions, hitting only the highlights. (Good listening and reading comprehension are essential skills for CI practitioners.)

Required Textbooks:
Student Evaluation

Grading Parameters
Final grades will be based on the following activities and weights in the table below.

<table>
<thead>
<tr>
<th>Assignment</th>
<th>Weight (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Active participation in class discussions</td>
<td>20%</td>
</tr>
<tr>
<td>Homework assignments designed to demonstrate understanding of the topics covered in the readings, recorded lectures, and discussions</td>
<td>20%</td>
</tr>
<tr>
<td>Primary research project (team effort)</td>
<td>15%</td>
</tr>
<tr>
<td>Teaching one analytic technique (individual effort)</td>
<td>15%</td>
</tr>
<tr>
<td>Company profile (individual effort)</td>
<td>15%</td>
</tr>
<tr>
<td>CI presentation (team effort)</td>
<td>15%</td>
</tr>
</tbody>
</table>

Grading Rubric (See Submission of Course Assignments for details.)
The following grading rubric will apply to the course. Grading rubrics for individual assignments can be viewed in Canvas. As always, students will be judged on the basis of showing improvement through the semester.

<table>
<thead>
<tr>
<th>Category</th>
<th>Level 4</th>

</tbody>
</table>

*Some consideration will be given to students for whom English is a second language, but team members should be watching for these types of errors and offering assistance/suggest corrections. All students are encouraged to work with a grammar and/or style guide, such as Strunk and White’s *Elements of Style*. **Students are encouraged to refer to the *Guidelines for Conducting Research* posted in Canvas for a quick review of how to evaluate resources for quality. While developed for a Knowledge Management course, the criteria for evaluation of resources apply to CI as well.
Grading Scale
The grade for excellent performance in a course will be a B. The grade of A will only be awarded for extraordinarily excellent performance. The grade of C will be reserved for those who demonstrate average performance. The grade of D indicates low achievement and will not be awarded at the graduate level. Grade appeals will ONLY be considered in the case of a documented clerical error.

\[
\begin{align*}
[90\% & - 100\%] &= A \text{ (Exceptional Achievement)} \\
[80\% & - 89\%] &= B \text{ (High Achievement)} \\
[70\% & - 79\%] &= C \text{ (Average Achievement)} \\
[60\% & - 69\%] &= D \text{ (Low Achievement)} \\
[0\% & - 59\%] &= F \text{ (Failing)}
\end{align*}
\]

Final Exam Information
While there is no final examination in this course, there is a final term assignment (Company profile) due by 6AM on December 8. This deadline is critical so that grades can be sent to the registrar in time for all who are graduating in December.

Course Calendar
The instructor reserves the right to alter course content or adjust the pace to accommodate class progress. The content of each week is described in the table below. Please complete the assigned readings before reviewing any recorded session or participating in a live Zoom session. This will ensure that you can contribute intelligently to the conversation and are ready to apply what you have learned in the readings to real-life situations. For your convenience, several of the PDF titles (with active links from the course calendar) have been uploaded to Canvas.

At the close of each week’s recorded lecture, your instructor will review upcoming individual and team assignments due the following week, providing additional guidance for completion. Additional videos – recorded Zoom sessions with CI platform vendors – will be made available to students to enhance their understanding of technology as used by CI practitioners. Announcements of free webinars available from various organizations will be posted to Canvas. Feel free to register for any (or all) to hear from CI practitioners themselves.

Zoom-based conference calls to review progress on team assignments will be scheduled twice during the semester; additional class meetings may be held based on progress through the semester. The instructor is always available should an individual or team request additional meeting/support.

<th>Topic</th>
</tr>
</thead>
</table>
| 0    | Completed by 8/22 | **Personal introductions:** Prior to the course, please upload a brief biographical sketch to Canvas that indicates why you chose this course and what you hope to learn during the coming weeks. (Both text and video are acceptable.) In it, tell me what you plan to do in the future. What type of career do you envision for yourself? How do you think that Competitive Intelligence might contribute to your success in that arena? There is no right or wrong answer here—it’s not a trick question. *This is designed to help me use examples throughout the semester that will resonate with you/your classmates.*

**Individual assignment #1 due by 6AM on Aug 23:** Please review client briefings in Canvas and select a team you would want to join by indicating your first and second choice in the Canvas Team Quiz. Team assignments will be posted in Canvas once all students have made their preferences known via the Quiz. <Value = 0 points>

| 1    | Aug 23 – Aug 28 | Welcome and review of syllabus, and formation of teams (the basis for the semester's work)

History and current state of CI: What is CI and how did it evolve?
The CI function within a variety of settings
What’s required to make CI work (well)?

**Individual assignment #2 due by 6AM on August 29:** Tell me how you got hold of a copy of the Bose article assigned for reading prior to the start of the semester. Be as specific as possible. This will indicate to me your normal process for information retrieval and allow me to offer alternatives in the coming weeks. Deposit your work in the Assignment section of Canvas. Feedback will be provided to the class as a whole, offering additional avenues you may wish to consider using in future. <Value = 2 points>

**Reading:** Tyson textbook, Preface + Chapter 1, *Introduction*

**Reading:** Bensoussan/Fleisher textbook, Chapter 1, *The role of analysis*

**ProQuest Video Series:** Competitive Intelligence for the non-CIer (5 brief videos)

| 2    | Aug 29 – Sept 4 | CI Cycle
Allocating your time: Achieving the right balance in apportioning the time you spend on CI
Building your proactive CI team and an appropriate process

**Team assignment #1 due by 6AM on September 5:** Based on the lecture, assigned readings, and any additional research your team chooses to undertake, identify the skill sets you think necessary to have represented on a CI team, the number of FTEs you believe are required to implement an effective CI program, where your team will report within the hierarchy, and justify the strategy you will take to achieve success (based on options presented in the lectures and through
| 3 | Sept 5 – Sept 11 | Establishing the scope and focus of your CI efforts  
Defining the competition and selecting screening criteria  
Key Intelligence Topics (KIT) and Questions (KIQ)  
PEST to STEEP to PESTLE analysis  

**Team assignment #2 due 6AM September 12:** Develop a Purpose Statement for your team’s CI project that limits the scope of your effort. You will be expected to review and revise this through the semester as your work progresses. Feedback will be provided to the group within the Canvas assignment grading tool and during our initial team Zoom meeting. Please insert the final version into your team CI presentation due at the end of the semester. <Value = 2 points>  

**Reading:** Tyson, Chapter 3, *Conducting a needs assessment*  
**Reading:** Bensoussan/Fleisher textbook, Chapter 5, *Driving forces analysis*  

**YouTube Video** covering KITs at [https://www.youtube.com/watch?v=dDgTWgySUks&list=PL453B5F10B7AAAB49&index=10&feature=plpp_video](https://www.youtube.com/watch?v=dDgTWgySUks&list=PL453B5F10B7AAAB49&index=10&feature=plpp_video) |

| 4 | Sept 12 – Sept 18 | Using the Web for gathering intelligence, including social networking tools. (We’ll discuss the UK library and databases available through it, plus others, in a later session.)  
The importance of environmental scanning, monitoring, and alerting mechanisms in CI work  

**Team assignment #3 due by 6AM on September 19:** Develop a set of Key Intelligent Topics and Key Intelligent Questions for your CI project that effectively limits the scope of your effort. <Value = 2 points>  

**Reading:** Tyson, Chapter 4, *Developing an implementation plan*  
**Reading:** Bensoussan/Fleisher textbook, Chapter 8, *Issue analysis*  

| 5 | Sept 19 – Sept 25 | Mining for market intelligence  

**Team assignment #4 due by 6AM on September 26:** Create a PESTLE analysis for your team’s industry sector. <Value = 2 points>

| Oct 31 – Nov 6 | **Competitive Intelligence analysis techniques**. Students will be assigned a CI analysis technique to present to the class. (Assignments will be made well in advance of this week via Canvas Quiz.) Presentations must be submitted to Canvas by 6AM on November 7 to assure that they can be made available for other students to review during Week 12 of this course. *<Value = 15 points>*<br>Using the Bensoussan/Fleisher book chapters as models, each student will devise a presentation that explains the merits, use, and value of their assigned CI analysis technique to the class. *Once submitted, these presentations will be uploaded to Canvas for the entire class to view.* Elements to cover in your presentation include:<br>• Description and purpose of the analysis<br>• History regarding the development of the analysis<br>• Strengths and weaknesses of the approach<br>• Best used for…<br>• How to do it<br>• An example.<br><br>**Reading:** Tyson, Chapter 10, *Analyzing your competition*<br>**Reading:** Bensoussan/Fleisher textbook, Chapter 3, *BCG growth/share portfolio*<br><br>A SWOT example from the American Marketing Association [http://playbook.amanet.org/providing-swot-example/](http://playbook.amanet.org/providing-swot-example/)<br>SWOT analysis becomes SWOC analysis [https://thinkmarketingmagazine.com/swot-become-swoc/](https://thinkmarketingmagazine.com/swot-become-swoc/)<br>Porter’s Four Corners [https://www.youtube.com/watch?v=CnDRQw930s0](https://www.youtube.com/watch?v=CnDRQw930s0)<br>BCG matrix [http://www.milnerltd.com/news/using-the-bcg-matrix-for-effective-portfolio-management/](http://www.milnerltd.com/news/using-the-bcg-matrix-for-effective-portfolio-management/)<br>Porter’s Five Forces [http://university-essays.tripod.com/porters_5_forces_analysis.html](http://university-essays.tripod.com/porters_5_forces_analysis.html)<br><br>Nov 7 – Nov 13 | **Competitive Intelligence analysis techniques**. Student presentations submitted in Week 11 will be published in Canvas covering additional techniques. A rubric has been devised to help students “grade” each presentation, available on Canvas. Use this as part of the discussion (to be guided by the instructor).<br><br>**Individual assignment #6 due at 6AM on November 14:** Based on your readings and what you learned from your fellow students, determine ALL analyses that would help you to complete your team presentation indicating what each would tell you that would get you closer to the “answer.” (Some of these analyses should be performed and contribute to your team CI project presentation.) *<Value = 2 points>*<br><br>**Reading:** Bensoussan/Fleisher textbook, Chapter 10, *Scenario analysis*<br>50 Competitive Intelligence Analysis Techniques [http://competia.com/50-competitive-intelligence-analysis-techniques](http://competia.com/50-competitive-intelligence-analysis-techniques)<br>War Games [http://whatifyourstrategy.com/2009/10/12/honey-we-shrunk-the-industry-again](http://whatifyourstrategy.com/2009/10/12/honey-we-shrunk-the-industry-again)
### Scenario Analysis

| 13   | Nov 14 - Nov 20 | Intelligence dissemination  
- Alerting mechanisms: Push AND Pull  
- A regular forum  
- Sharing raw data and mapping information flows  
- Visualization tools and dashboarding  
Presenting what you know: Making intelligence actionable  
Converting data into revenue-producing action  
Developing, designing, implementing, and altering strategies in response to your intelligence and analysis: The ‘best practices’ approach

**TEAM Primary Research Assignment due 6AM Nov 21**: Submit a list of questions you would ask when conducting primary research for your team project, including rationale for what you hope to learn from each, plus a set of protocols members of your team would use to assure consistent results, and the respondents you will target for the primary research effort. You need not conduct the primary research effort. Additional guidelines have been provided in this week’s recorded lecture. Examples have been placed in Canvas for teams to use as models, or using the research skills developed during this course, teams can find a suitable model of their own.  
*Value = 15 points*

*Reminder – Team competitive intelligence presentations are due December.  
*Value = 15 points*
Course Assignments
Homework assignments are designed to reinforce concepts covered in the readings and lectures/discussions, helping the instructor understand where additional explanation or emphasis is required in future weeks. Each contains an element of what you will have to know/understand/do as a CI professional. Assignments are due by 6AM on the date indicated in the calendar. Please note that some homework assignments are designated as TEAM assignments; others are INDIVIDUAL assignments. Please make sure that your name and team are noted on all assignments submitted. (All members of a team will receive the same grad for team assignments.)

The instructor has recorded lectures via Zoom, deposited in Canvas. Students can check whether they have understood the content of recorded lectures by answering UNGRADED questions in Canvas Quiz. Those having difficulty answering a quiz can re-listen to the recordings, reinforcing the major concepts (learning objectives) outlined at the start of each lecture.

The instructor will be selecting responses to homework assignments as the basis for discussion threads. Students are encouraged to watch the Discussion Board throughout the semester for questions designed to reinforce what you are learning on your own or in teams. Thoughtful postings can help to raise your grade.

This semester, students will work in teams. Business cases have been placed in Canvas for review at the start of the semester. Each student will select team (via Canvas Quiz). The calendar indicates those assignments that are team-based. Each team will produce a CI presentation for its “client,” based on the purpose and scope of the project the team devises for itself. Each member of the team will select a different company to profile for their final individual assignment in this course.

In addition to the secondary research to be conducted during the semester, each team will develop materials necessary for conducting a primary research effort. Deliverables for this assignment consist of (1) a suitable data collection instrument, most likely an interview questionnaire (along with protocol for conducting the interview via email, telephone, or in-person), though survey is another option and (2) identification of potential respondents for this primary research gathering effort. It is NOT necessary for teams to conduct the primary research. Examples will be placed in Canvas, but teams need not use these as models if they have alternative resources or ideas.

Students will select one CI analytic technique to teach to the class (based on responses to Canvas Quiz #2). Your effort will be assessed by the instructor as well as by your classmates. Guidelines for presentations will be covered in class, with additional material and examples posted in Canvas. You’ll want to describe each technique, identify its purpose, indicate “best used for,” strengths and weaknesses, and “how to do it.” A rubric for assessing the presentations will be provided and form the basis for discussion (to be led by the instructor). (HINT: Use the organization of chapters in your Analysis without paralysis textbook as an example for this assignment.)
**Participation**
To successfully complete the course, active participation throughout the semester is required and is a component of each student’s course grade. Please refer to the Grading Rubric (above) for details regarding how participation contributes to your grade.

A Canvas course site is set up for this course. As Canvas will be the primary tool used for communication between the instructor and the students, each student is expected to check the site throughout the semester. Vendors will pre-record demonstrations of their competitive intelligence platforms for review by students throughout the semester. These recordings will be available to students in Week 13 for review.

**Submission of Course Assignments:**
Use the Assignment section of the course’s Canvas site to submit all individual assignments. Please use proper English grammar and best practices when citing material. Additional guidelines and pointers to tools will be shared with the class within Canvas.

There is no specific required length for any submission, format, or file type. Including your name and the assignment number on the document and in the file name (e.g., Keiser_Homework2) would be helpful. Assignments are due at noon on the date indicated in the course calendar, above.

**Group Work and Collaboration:**
CI is a team effort – no single person possesses all the skills (nor has the time) required to make a CI program successful. Adapting to teamwork, where members of the team may be miles (or even continents) away, is essential. Working as a productive team – contributing to the team effort - can only improve your final grade. This semester, the class will work as a team to complete the industry sector overview and analysis.

**Course Policies and Guidelines**
Students are expected to attend all scheduled class sessions. Failure to attend class will result in an inability to achieve the objectives of the course. Excessive absence will result in loss of points for team participation.

**Excused Absences:**
Students need to notify the professor of absences prior to class when possible. S.R. 5.2.4.2 defines the following as acceptable reasons for excused absences: (a) serious illness, (b) illness or death of family member, (c) University-related trips, (d) major religious holidays, and (e) other circumstances found to fit “reasonable cause for non-attendance” by the professor.

Students anticipating an absence for a major religious holiday are responsible for notifying the instructor in writing of anticipated absences due to their observance of such holidays no later than the last day in the semester to add a class. Information regarding dates of major religious holidays may be obtained through the religious liaison, Mr. Jake Karnes (859-257-2754).

Students are expected to withdraw from the class if more than 20% of the classes scheduled for the semester are missed (excused or unexcused) per university policy.

**Verification of Absences:**
Students may be asked to verify their absences in order for them to be considered excused. Senate Rule 5.2.4.2 states that faculty have the right to request “appropriate verification” when students claim an excused absence because of illness or death in the family. Appropriate notification of absences due to university-related trips is required prior to the absence.

**Academic Integrity:**
Per university policy, students shall not plagiarize, cheat, or falsify or misuse academic records. Students are expected to adhere to University policy on cheating and plagiarism in all courses. The minimum penalty for a first offense is a zero on the assignment on which the offense occurred. If the offense is considered severe or the student has other academic offenses on their record, more serious penalties, up to suspension from the university may be imposed.

Plagiarism and cheating are serious breaches of academic conduct. Each student is advised to become familiar with the various forms of academic dishonesty as explained in the Code of Student Rights and Responsibilities. Complete information can be found at the following website: [http://www.uky.edu/Ombud](http://www.uky.edu/Ombud). A plea of ignorance is not acceptable as a defense against the charge of academic dishonesty. It is important that you review this information as all ideas borrowed from others need to be properly credited.

Part II of Student Rights and Responsibilities (available online [http://www.uky.edu/StudentAffairs/Code/part2.html](http://www.uky.edu/StudentAffairs/Code/part2.html)) states that all academic work, written or otherwise, submitted by students to their instructors or other academic supervisors, is expected to be the result of their own thought, research, or self-expression. In cases where students feel unsure about the question of plagiarism involving their own work, they are obliged to consult their instructors on the matter before submission.

When students submit work purporting to be their own, but which in any way borrows ideas, organization, wording or anything else from another source without appropriate acknowledgement of the fact, the students are guilty of plagiarism. Plagiarism includes reproducing someone else's work, whether it be a published article, chapter of a book, a paper from a friend or some file, or something similar to this. Plagiarism also includes the practice of employing or allowing another person to alter or revise the work a student submits as his/her own, whoever that other person may be.

Students may discuss assignments among themselves or with an instructor or tutor, but when the actual work is done, it must be done by the student, and the student alone. When a student’s assignment involves research in outside sources of information, the student must carefully acknowledge exactly what, where and how he/she employed them. If the words of someone else are used, the student must put quotation marks around the passage in question and add an appropriate indication of its origin. Making simple changes while leaving the organization, content and phraseology intact is plagiaristic. However, nothing in these Rules shall apply to those ideas so generally and freely circulated as to be a part of the public domain (Section 6.3.1).

Please note: Any assignment you turn in may be submitted to an electronic database to check for plagiarism.

**Accommodations due to disability:**
If you have a documented disability that requires academic accommodations, please see me as soon as possible during scheduled office hours. In order to receive accommodations in this course, you
must provide me with a Letter of Accommodation from the Disability Resource Center (Room 2, Alumni Gym, 257-2754, email address: jkarnes@email.uky.edu) for coordination of campus disability services available to students with disabilities.

**Technology Information & Resources**

Students are expected to have a minimum level of technological acumen and the availability of technological resources. Students must have regular access a computer with a reliable Internet connection and audio capabilities. Please see the Canvas online guide for additional guidance: [https://guides.instructure.com/m/4214/l/82542](https://guides.instructure.com/m/4214/l/82542)

Please be certain that your computer and/or browser allow you to view Adobe Reader documents (.pdf). As your instructor, I am your first go-to person for technology problems. Please e-mail me at Barbie.Keiser@uky.edu for the timeliest response.
